

## **Product Availability Statement**

4D Systems aspires to supply its product for as long as possible. However, as 4D Systems relies on its suppliers, 4D Systems cannot 100% guarantee the availability of modules, displays, individual components or materials used in 4D Systems products, or as stand-alone items, over long terms such as 5 or 10 years.

4D Systems can only supply product for as long as the materials are available on the open market, and 4D Systems will continue to supply and offer product for as long as possible, provided suitable demand for the product exists, and there is suitable supply of the materials/components available within maintainable limits in order to produce a viable product which can be sold.

Any End of Life (EOL) notifications 4D Systems makes are made in advance as soon as possible, and typically are made within 3-6 months of the final production run of the product. In the event of discontinuation of a product, if possible a suitable alternative will be aimed to be provided. In some rare cases, however, it is not always possible to give advance notice due to surprise discontinuation of materials/components from suppliers, which leaves 4D Systems with little time to pass on the announcements.

4D Systems will do as much as possible to continue supply of popular product lines to maintain supply to customers and to provide adequate notice to customers, where possible, in advance of a product/components/material becoming unavailable.

Should you have any questions regarding this statement or stance from 4D Systems, please be sure to make contact with us to discuss.
